

**Dmitry  
Kharitonov**

I'm developing web-services and apps. Interested in development for mobile platforms. I like clarity and minimalism in design of code, things and products. My [github.com/geakstr](https://github.com/geakstr) 

I'm 22, live in Russia, Astrakhan. Love music, play guitar and ride a bike.

My email [geakstr@me.com](mailto:geakstr@me.com) and [facebook.com/geakstr](https://facebook.com/geakstr) for contacting.

- Skills**
- Java as main tool. In my practice, usually, I use Spring Boot Framework with JPA (Hibernate) and Thymeleaf template engine
  - Experience on Front-End Development with HTML5, CSS3 and JavaScript using modern tools
  - Working with Node.js and writing real-time systems (with Socket.IO)
  - Mobile app development under Android platform
  - OpenGL for game development (I use LWJGL)
  - I worked with SQL in OracleDB, MySQL, SQLite and PostgreSQL. I have some experience with NoSQL (MongoDB)
  - Some skills of development on PHP, C#, Ruby and Python
  - Also I have some experience in working with frameworks for testing: JUnit, Mocha and Selenium WebDriver

- Tools**
- Git
  - UNIX-like OS
  - Writing scripts on Bash
  - Automation tools (gulp, gradle)
  - I'm also very interested in UI, UX, typography and design
  - Basic knowledge of Scrum and other project management methodologies
  - Using IntelliJ IDEA and Sublime Text for development and Sketch.app for drawing simple graphics

- Projects**
- I start to develop [app for time management](#) like TaskPaper,

but with extended features and web client

- From time to time I come back to developing my own [voxel-based game](#) just for fun
- For the experiment I developed client-server Android app for dating with users in VK social network. App allows finding new people, chatting with them and view photos. On Back-End I use Spring Boot/PostgreSQL. In Android for REST were used Retrofit and Robospice; Picasso — for working with images; ACRA — for crash report system; Flurry/Google Analytics — for analyse. For chatting and push notifications was used Google Cloud Messaging
- At work at the university I developed system for agile collecting and reporting statistics; service for synchronizing data between accounting of university and bank

## Education

2010–2014	Astrakhan State University, Bachelor of Information Systems
2014–now	Astrakhan State University, Master of Information Systems
<hr/>	
	Participated in ACM ICPC in 2011–2013

## Work

2013–now	Astrakhan State University, Software Engineer
----------	-----------------------------------------------

## Plans

I'm interested in working with Big Data in mobile and web services (I think geo data and personalization in services is a very interesting theme)
